

Forged in Flames : Dilemma

Muhammad Faliq Bin Al-Hakim

Setup

- Player is an ex -Fireman & -Emergency Medical Technician (EMT)
- Caught in a burning Town Centre with the family (Wife & Daughter) and other civilians there
- Due to the harsh weather on the other side of town, landslides had blocked traffic routes, forcing Rescue and Fire Trucks to take a long detour and delaying rescue
- Foggy weather had reduced the visibility for safe deployment of rescue choppers as well
- Player was separated from the family when the initial explosion occurred
- Player starts at the entrance of the Town Centre
- With the knowledge gained in the Fire House and the pride of a Fireman, Player is determined to save their family and other civilians along the way

Setup - Control

- W, A, S, D to Move
- Spacebar to Jump
- E to interact (Kick, Carry, Perform CPR, and more)

Hook

- Player managed to rescue some civilians but still have not found their family
- Player found daughter's necklace on the floor and foot prints leading into a burning building in the deeper in the scene
- Player found a used Molotov Bottle on the floor as well, suggesting that this was no accident

Development - Requirements

- Building Door where the family is trapped in cannot be broken by kick. Building has no windows or vents.
 - Require Ax to break through the door
 - Ax is available in Lumberjack Shop
- Lumberjack Shop door has caved in, Player notice smoke coming out from the top of the shop, suggesting an opening or vent at the top. Require Crowbar to pry vent open
 - Crowbar is available in Hardware Store

Development

- 1:
Acquired Fire Extinguisher from restaurant while rescuing civilian
- 2:
Acquired Crowbar from Hardware Store while rescuing civilian
- The inside of the Hardware Store is a maze due to the damage done
- 3:
Acquired Ax from Lumberjack Shop
- Lumberjack Shop is a tower (4 storey high)
- Need to climb to access the vent

Development

- Player hears daughter's cries faintly from the building, giving them hope that the family is still alive

Turn

- When Player finally managed to break into the building where the family is, they found their wife laying motionless atop the daughter with a beam on her back
- Daughter looks barely injured
- Player removed the beam and tried performing CPR on wife but it was too late
- Player carried wife's body and brought the daughter outside where it was relatively safer

Turn

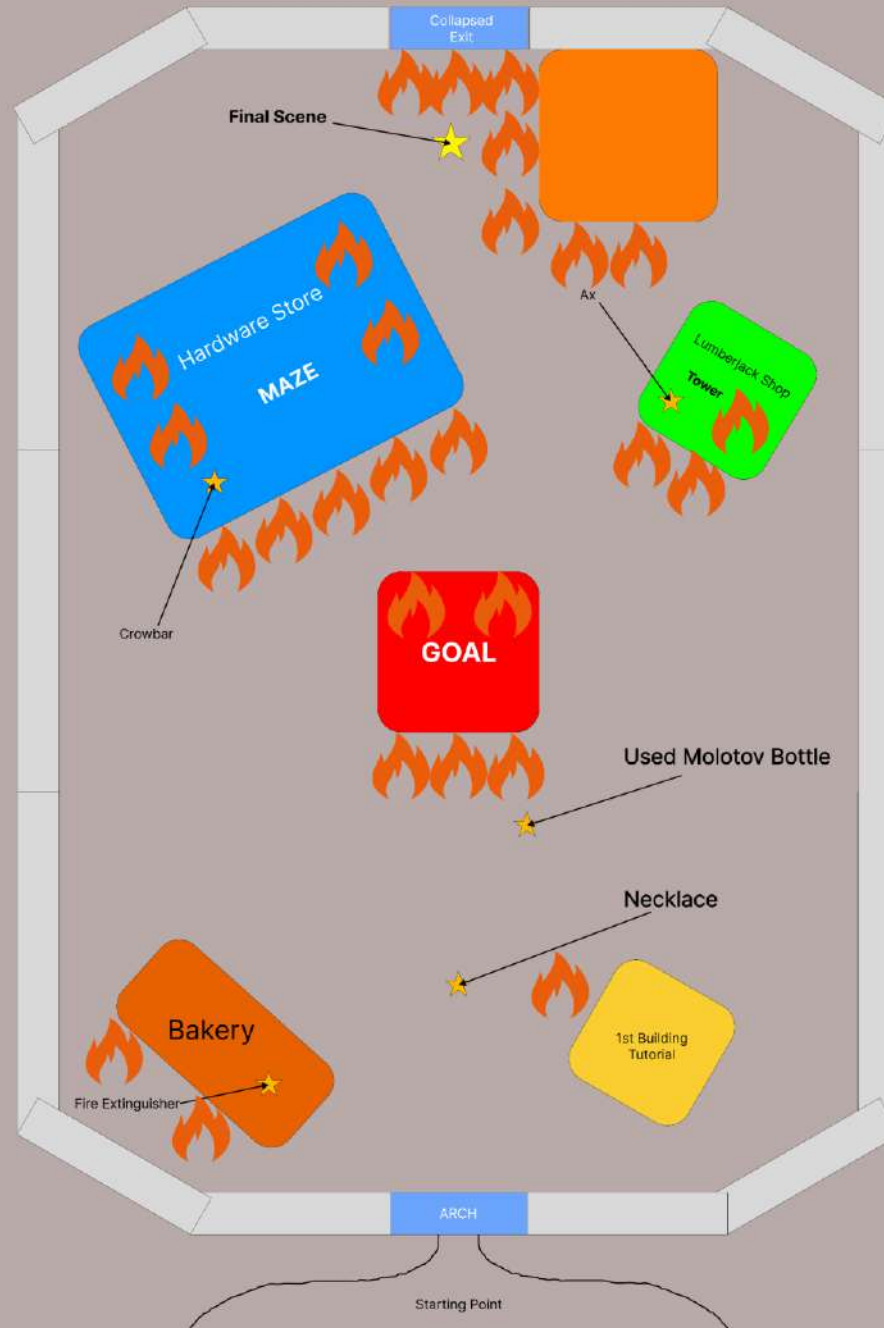

- Outside, you saw a man outside with a Molotov bottle in hand
- As both eyes' met, Player has connected the dot and figured out that this man is the arsonist
- Instinctively, Player gave chase in a flash and the man had no time to react to throw that bottle, so instead, he started running
- Player managed to chase him into a dead end where a burning pillar from the nearby building fell on him
- Now, the Pride of a Fireman tells the Player to save him but knowing that he is responsible for the Player's wife...

Resolution

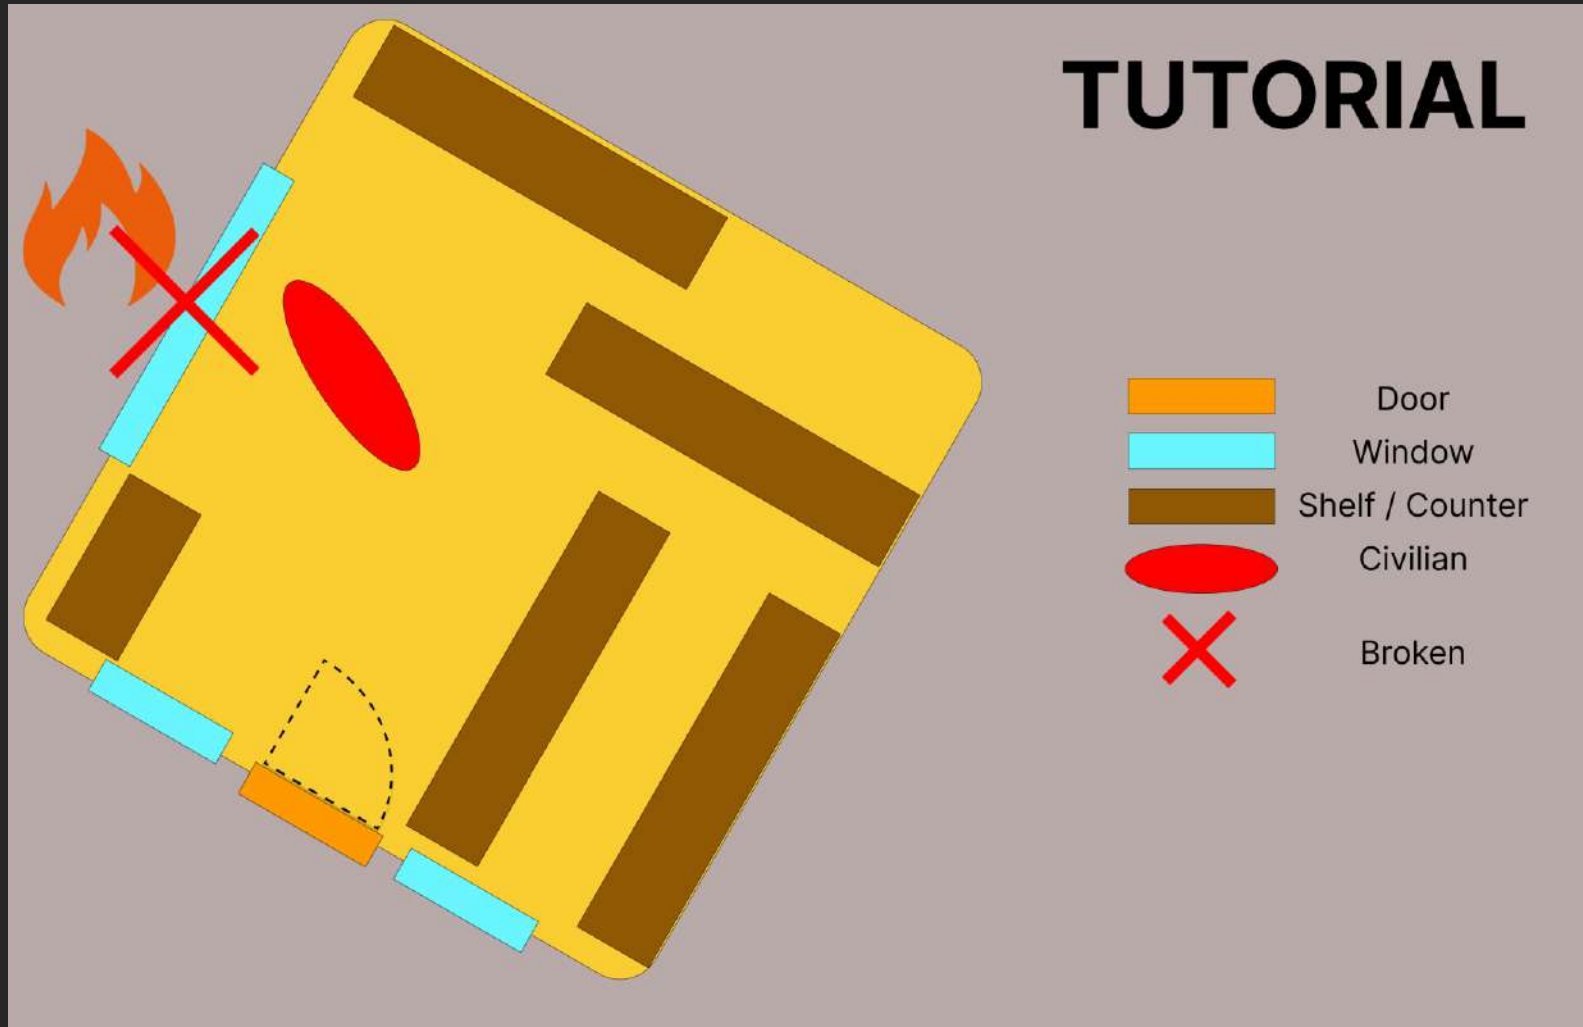

- Player is in a dilemma of whether to save the man...

I woke up and was greeted with the burning Town Centre. There was a huge explosion and I'm separated from my family. As an ex-Fireman, my pride and instincts are urging me to save the people, especially my Family...

I woke up and was greeted with the burning Town Centre. There was a huge explosion and I'm separated from my family. As an ex-Fireman, my pride and instincts are urging me to save the people, especially my Family...

I found a used Molotov Bottle... Was this the work of someone?

I woke up and was greeted with the burning Town Centre. There was a huge explosion and I'm separated from my family. As an ex-Fireman, my pride and instincts are urging me to save the people, especially my Family...

I found a used **Molotov Bottle**... Was this the work of someone?

Fortunately, there is a serviceable **Fire Extinguisher**. I can proceed further in.
